

CLAIM AMENDMENTS

This listing of claims will replace all prior versions, and listing, of claims in the application:

Listing of Claims:

Claims 1-22 (Canceled)

Claim 23. (Currently Amended) A mirror assembly for a vehicle comprising:

a mirror housing;

a first reflective element having a first field of view;

a second reflective element having a second field of view, the second field of view being wider than the first field of view, wherein the first and second reflective elements are operably associated with the mirror housing; and

an indicator light assembly for generating a light signal, the indicator light assembly [being supported by] operably associated with the mirror housing; [and

a backing assembly supported by the mirror housing, the backing assembly supporting the first reflective element and the second reflective element]

wherein the indicator light assembly comprises:

a light source; and

a lens for focusing light generated by the light source;

wherein the light source and the lens are operably associated with the mirror housing.

Claim 24. (Canceled)

Claim 25. (Currently Amended) The mirror assembly of claim 24 23 wherein the light source comprises a plurality of light emitting diodes (LEDs).

Claim 26. (Original) The mirror assembly of claim 25 wherein the LEDs operate simultaneously to provide a single light emission.

Claim 27. (Original) The mirror assembly to claim 25 wherein the LEDs operate sequentially to provide a directional component to the indicator light.

Claim 28. (Currently Amended) The mirror assembly of claim 24 23 wherein the light source further comprises a light source and a light pipe to provide light to the lens.

Claim 29. (Original) The mirror assembly of claim 23 wherein the second reflective element is disposed below the first reflective element and the indicator light assembly is interposed between the first and second reflective elements.

Claim 30. (Currently Amended) A mirror assembly for a vehicle comprising:
a mirror housing;
a first reflective element having a first field of view;
a second reflective element having a second field of view, the second field of view being wider than the first field of view; and
an indicator light assembly for generating a light signal; [and

a backing assembly supported by the mirror housing, the backing assembly supporting the first reflective element, the second reflective element, and the indicator light assembly]

wherein the first reflective element, second reflective element and indicator light assembly are operably associated with the mirror housing.

Claim 31. (Original) The mirror assembly of claim 30 wherein the first reflective element is formed of one of plastic and glass.

Claim 32. (Original) The mirror assembly of claim 30 wherein the second reflective element is formed of one plastic and glass.

Claim 33. (Original) The mirror assembly of claim 30 wherein a portion of the backing assembly supporting the second reflective element is formed in a desired shape of the second reflective element.

Claim 34. (Original) The mirror assembly of claim 30 wherein an orientation of the second reflective element is adjustable independently of the first reflective element.

Claims 35-56 (Canceled)
